INTERACTIONS OF NUTRITION AND INFECTION

INTERACTIONS OF NUTRITION AND INFECTION

NEVIN S. SCRIMSHAW, Ph.D., M.D., M.P.H.

*Professor of Nutrition, Head of the Department of Nutrition and Food Science,
Massachusetts Institute of Technology, Cambridge, Mass., USA*

CARL E. TAYLOR, M.D., Dr P.H., F.R.C.P. (Canada)

*Professor and Director, Department of International Health,
The Johns Hopkins University School of Hygiene and Public Health,
Baltimore, Md, USA*

JOHN E. GORDON, Ph.D., M.D., F.R.C.P. (Lond.)

*Senior Lecturer (Epidemiology), Clinical Research Center,
Department of Nutrition and Food Science, Massachusetts Institute of Technology,
Cambridge, Mass., USA;*

*Professor of Preventive Medicine and Epidemiology (Emeritus),
Harvard University, Cambridge, Mass., USA*

Prepared in consultation with seventeen specialists
in various countries

CONTENTS

	Page
PREFACE	9
CHAPTER 1. BASIC PRINCIPLES AND CONSIDERATIONS	11
Introduction	11
Multifactorial causality of disease	11
Kinds of interaction	12
Effect of infection on nutrition	12
Effect of nutrition on infection	13
Ecologic determination of disease	14
Variations with time	14
Variations with place	15
Variations with person	15
Synergism and antagonism	16
Definitions	17
Epidemiology	17
Nutrition	19
Microbiology	19
Interpretation of experimental results	19
Trends in medical and public health emphasis	20
Nature of the evidence	22
CHAPTER 2. EFFECT OF INFECTION ON NUTRITIONAL STATUS	24
Introduction	24
Infection and protein nutritional status	26
Intestinal infection of bacterial origin	26
Tuberculosis	28
Other acute bacterial infections	29
Viral infections	30
Rickettsial infections	32
Protozoal infections	32
Helminthic infections	34
Excess of protein or amino acids	36
Infection and recovery	37
Infection and nutritional status, other nutrients	40
Vitamin A	40
Thiamine	41
Other B-complex vitamins	42
Ascorbic acid	44
Vitamin D	46
Vitamin K	46
Iron	46
Other minerals	50
Lipids	52
Carbohydrates	53
Enzymes	54
Unknown factors	55
Effect of infection on growth and development	55
Summary	58
CHAPTER 3. EFFECT OF MALNUTRITION ON RESISTANCE TO INFECTION	60
Introduction	60
Multiple nutritional deficiencies	60
Tuberculosis	63
Diarrheas and dysenteries	64
Respiratory diseases	65
Other infectious diseases	65

Protein and amino acid deficiencies	68
Bacterial infections	75
Rickettsial infections	81
Viral infections	81
Protozoal infections	83
Helminthic infections	84
Fungal infections	86
Generalizations	87
Specific vitamin deficiencies	87
Vitamin A	87
Other fat-soluble vitamins	94
Ascorbic acid	97
Vitamin B-complex	100
Thiamine	102
Riboflavin	109
Niacin	111
Pyridoxine	112
Pantothenic acid	114
Folic acid and vitamin B ₁₂	118
Biotin, inositol and choline	120
Para-aminobenzoic acid	122
Mineral deficiencies	125
Iron	125
Calcium and phosphorus	128
Potassium	129
Manganese	129
Selenium	129
Cobalt	130
Unknown or obscure factors	130
Inanition	133
Carbohydrate and fat	137
Nutrient excesses	138
Generalizations	140
CHAPTER 4. DETERMINANTS OF THE EFFECTS OF NUTRITION ON INFECTION	143
Introduction	143
Innate characteristics of host and agent	143
Synergistic action of nutritional deficiencies	148
Antibody formation	148
Phagocytic activity	157
Non-specific protective substances	161
Non-specific destruction of bacterial toxins	164
Tissue integrity	165
Wound healing and collagen formation	166
Altered intestinal flora	167
Endocrine imbalance	172
Response to drug therapy	176
Antagonistic action of nutritional deficiencies	177
Host factors	179
Agent factors	180
CHAPTER 5. PRINCIPLES OF FIELD STUDY OF HUMAN POPULATIONS	183
Introduction	183
Field study of human nutrition and nutritional disease	184
Scope and content of epidemiology	187
Tracing reservoirs and sources of infection	188
Administrative control of disease	189
Identification of agents of disease	189
Geographic pathology	190
Clinical epidemiology	191
Statistical epidemiology	192

Field survey	193
Field incidence study	194
Experimental epidemiology	194
A concept of epidemiology	195
Conduct of epidemiologic field studies	196
Nature of field investigation	196
The conceptual idea	197
Field reconnaissance	199
Experimental design	201
Field organization	203
Exploratory study	206
Pilot study	207
Definitive study	207
Analysis and interpretation of results	208
Direction of future research	210
The INCAP field study of nutrition and infection	210
Comment	213
CHAPTER 6. WEANLING DIARRHEA—A SYNERGISM OF INFECTION AND NUTRITION	216
Introduction	216
The diarrheas of a general population	216
Acute diarrheal disease of early childhood (weanling diarrhea)	219
Clinical characteristics	219
Agents of disease	221
Epidemiology	226
Weanling diarrhea in the Punjab, India	229
Collection of data	229
Feeding of infants	230
Weaning procedures	231
Acute diarrheal disease among wholly breast-fed children	232
Diarrheal disease during weaning	233
Acute diarrheal disease after weaning	236
Seasonal factors	237
Deaths from acute diarrheal disease	238
Weanling diarrhea in Guatemala	240
Clinical and epidemiologic features	240
Death rates	241
Index case in family outbreaks	243
Familial secondary attack rates	244
Endemicity and epidemicity	245
Modes of transmission	246
Nutritional state and diarrheal disease	249
Concentration of diarrheal disease in the weaning period	251
Prevention and control of weanling diarrhea	253
Preventive measures	253
Care of the patient	257
Epidemic control	258
Research	259
Priorities	260
CHAPTER 7. SUMMARY AND CONCLUSIONS	262
Effect of malnutrition on resistance to infection	262
Determinants of nutritional effects	263
Effect of infection on nutritional status	264
Public health considerations	265

LIST OF REVIEWERS

- Sir Christopher Andrewes, Overchalke, Coombe Bissett, Salisbury, Wiltshire, England
- Dr. J. F. Brock, University of Cape Town, Department of Medicine, Wernher and Beit Medical Laboratories, Observatory, South Africa
- Sir Macfarlane Burnet, Director, The Walter and Eliza Hall Institute of Medical Research, Melbourne, Australia
- Dr. R. N. Chaudhuri, School of Tropical Medicine, Calcutta, India
- Dr. F. W. Clements, The Institute of Child Health, Commonwealth Health Department, The University of Sydney, Royal Alexandra Hospital for Children, Camperdown, New South Wales, Australia
- Professor W. J. Darby, Director, Division of Nutrition, Department of Medicine and Biochemistry, Vanderbilt University, School of Medicine, Nashville, Tenn., USA
- Dr. A. Delaunay, Department of Experimental Pathology, Pasteur Institute, Garches, Seine-et-Oise, France
- Dr. R. J. Dubos, The Rockefeller University, New York, USA
- Professor Sven Gard, Department of Virus Research, Karolinska Institutet, Stockholm, Sweden
- Dr. D. B. Jelliffe, Institute of Nutrition, University of the West Indies, Kingston, Jamaica
- Professor N. K. Jerne, Chairman, Department of Microbiology, School of Medicine, University of Pittsburgh, Pa., USA
- Dr. P. L  pine, Chief, Virus Division, Pasteur Institute, Paris, France
- Professor B. G. Maegraith, School of Tropical Medicine, Liverpool, England
- Professor S. D. Mo  skovkij, Chief, Department of Parasitology, Institute of Parasitology and Tropical Medicine, Moscow, USSR
- Dr. N. Nestorescu, Assistant Director, Institutul Dr. I. Cantacuzino, Bucharest, Romania
- Dr. H. A. P. C. Oomen, Koninklijk Instituut voor de Tropen, Amsterdam, Netherlands
- Dr. M. Roche, Instituto Venezolano de Investigaciones Cientificas, Caracas, Venezuela
